1. About Extension

Magento 2 Smart Categories extension enables to make category management simpler, faster, and more efficient. Instead of manually assigning products to each new or existing category, the extension allows you to populate them based on conditions automatically.

2. Feature List

- Make Any Category Dynamic
- Set Advanced Conditions to Populate Categories
- Preview Dynamically Added Products
- Auto Update Categories
- Enable Product Attributes for Smart Category to Set Conditions

2.1 Make Any Category Dynamic

This extension allows you to make any category dynamic. The extension adds the Smart Category option to each category. Store owners can enable the Smart Category option to automatically add products to the smart category.

2.2 Set Advanced Conditions to Populate Categories

Store owners can set different conditions to populate the smart category. You can set different conditions using product attributes like new, sale, price, color, size, etc.

2.3 Preview Dynamically Added Products

Once, you have set the conditions & saved the category configurations. Then, you can preview all the dynamically added products in the **category edit page in Products in Category Tab**. You can unselect any of the products shown in the grid according to your requirements.

2.4 Auto Update Categories

Store owners can easily update products in the smart categories just by setting the conditions. Products are automatically updated as you change the conditions.

2.5 Enable Product Attributes for Smart Category to Set Conditions

You can enable any of the product attributes to set the smart category conditions. The enabled product attributes like sale, size, etc. for the smart category will appear in conditions dropdown.

3. Setup the Extension

At the backend, go to **FME EXTENSIONS > Configurations**. Here you can find the extension configurations.

3.1 General Configurations

Now, expand the **General Configurations Tab** & set the following configurations:

- **Module Enable:** Enable/Disable the extension

3.2 Enable Product Attributes for Smart Category to Set Conditions

At the backend, go to **Store > Products**. Product Attributes grid will open

- Click any of the **product attributes** like color, etc. based on your requirements
- Once the **attribute edit page** is opened, **click on the storefront properties**
- Here, you can set the **For FME Smart Category Rule** to **Yes**
- **Save** the Attribute
- The enabled product attribute will automatically appear in **smart category conditions dropdown**
