# 1. About the Extension

Magento 2 advanced layout manager brings convenience to content editing and layout customization. It allows you to login as a customer and edit any product, category, CMS page, or block from the frontend and preview the changes right there. The extension makes it easy and quick to make edits and preview the changes.

## 2. Feature List

- Edit any of the following pages from the frontend
  - Product Page
  - Category Page
  - CMS Page
  - Block
- Login as Customer
- Preview Backend Changes Easily
- Set Frontend Login Time

### 2.1 Access Product Edit Page from Frontend

The extension acts as a frontend editor. You can go to any product page on the frontend and click the “Edit” option to open the editor. Make the required changes and preview them right there after you have saved the changes.

### 2.2 Access Category Edit Page from Frontend

Like product pages, you can edit any category page from the frontend. Navigate to any category you would like to edit and you will see the edit option which will take you to the category edit page. Make the edits and preview them right on the frontend.

### 2.3 Access CMS Edit Page from Frontend

You can make changes to any CMS page such as About us, Contact us, or Privacy Policy page the same way as you do to any product or category page.

### 2.4 Access Block Edit Page from Frontend

There is nothing you can't edit from the frontend with this extension. If you have added a block anywhere on your page and want to change its content or layout, you can

easily do so. You can add/delete images, videos, text, links to the block, change its layout or delete the block altogether.

### 2.5 Login As Customer

The extension lets you login as a customer without any backend configurations and see the store from the customer's eyes. This allows you to identify what changes are required from a customer's point of view.

### 2.6 Preview Button on Backend

By default, when you make changes from the backend, you need to go to customer view to see how they look. The extension saves you this step by adding a preview button on the product, category, & CMS backend page. Now you can preview the changes right on the backend.

### 2.7 Set Frontend Login Time

How long do you want to stay logged in on the frontend? You can specify this time in seconds. You will be logged out automatically once the time reaches and you will have to login again to see the edit options.

## 3. Setup the Extension

### 3.1 Configuration

In the admin panel, go to **FME EXTENSIONS > Configuration**. Here you can find the extension configurations.

#### 3.1.1 General configuration

- **Enter email to create user:** Enter a customer email address. Note that this customer should already be registered. To add a customer, you can go to **Customers > All Customers > Add New Customer**.
- **Enable extension:** Select "Yes" to enable the extension.
- **Enter time in seconds:** Enter the time in seconds for which you want to stay logged in on the frontend.

## FME Extensions

Enter email to create user  
[store view]

fme-admin@admin.com

☐ Use system value

Enable extension  
[store view]

Yes

☐ Use system value

Enter time in seconds  
[store view]

1000

☐ Use system value

The above user is one of the registered customers as shown below.

<input type="checkbox"/>	ID	Name	Email	Group	Confirmed email	Action
<input type="checkbox"/>	2	Veronica Costello	ronl_cost@example.com	General	Confirmation Not Required	<a href="#">Edit</a>
<input type="checkbox"/>	3	admin admin	fme-admin@admin.com	General	Confirmation Not Required	<a href="#">Edit</a>

## About us

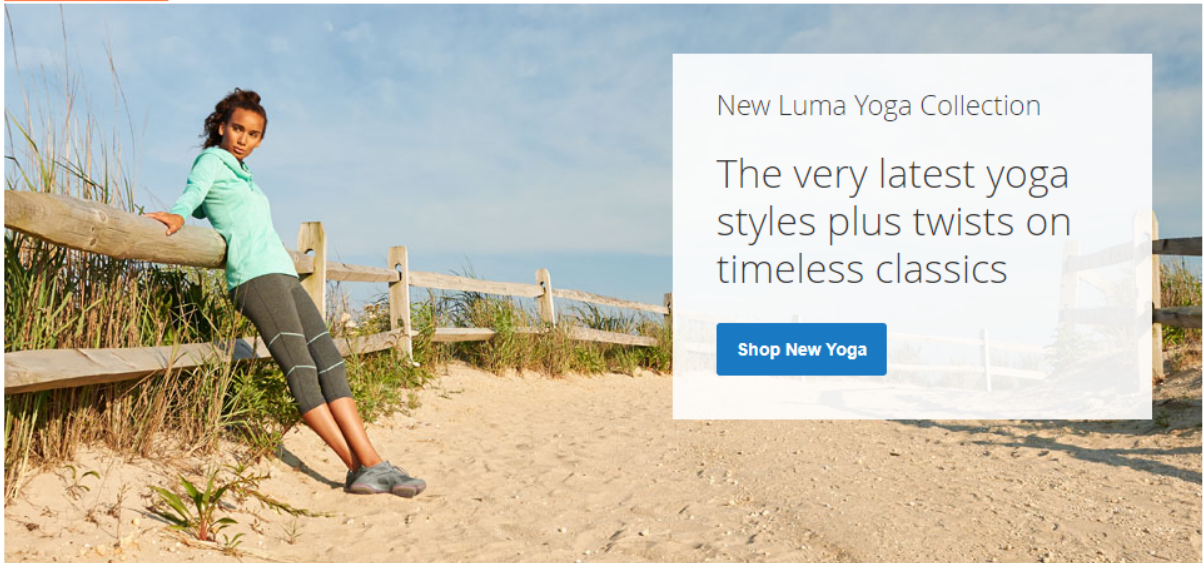

With more than 230 stores spanning 43 states and growing, Luma is a nationally recognized active wear manufacturer and retailer. We're passionate about active lifestyles – and it goes way beyond apparel.

At Luma, wellness is a way of life. We don't believe age, gender or past actions define you, only your ambition and desire for wholeness... today.

We differentiate ourselves through a combination of unique designs and styles merged with unequalled standards of quality and authenticity. Our founders have deep roots in yoga and health communities and our selections serve amateur practitioners and professional athletes alike.

### 3.2.4 Edit Button to Access Block Edit Page

An “Edit This Block” option appears above every block which you can use to make the required changes to the block.
