

## General Installation instructions

- First, open up your ZIP-file and copy the whole "app, skin and js"- folders on the main root of your local magento server (you will need to merge these files).
- A message may popup and warn you that there are similar files already on your server. You will need to select overwrite to overwrite the same files. If not, don't worry, it will still work.
- This may take up to 5-10 minutes depending on your connection.
- Log in to backend of your Magento Administration and go to "System" → "Configuration". At left side click on "Design" tab.
- At right side under "Theme" tab give "**beauty\_products**" against "Default" text field.
- Give "**beauty\_products**" against "**Skin (images/ CSS)**" text field. This is for skins and click "Save".
- Under "Header" tab give "**images/logo.jpg**" against "Logo Image Src" text field.
- Under "Footer" tab give "**Copyright © 2010 www.siteurl.com**" against "Copyright" text field. You can change this text according to your company name to display in copyrights.
- Now click Save Config.
- Disable the Cache in System → Cache Management).
- Select all options. Then either refresh or disable your cache. Refresh means it will refresh your cache, Disable will disable your cache. We recommend disabling your cache when installing your theme and re-enabling it after you are done installing.
- Ok, the template is active but your template includes more functionality which needs to be configured to make it work 100%.

## Static Blocks

Static Blocks are extra HTML or Plain Text that can be integrated to your store. We set these up so you can customize links, images or text included in our themes.

We are now going to install our static blocks for this theme, go to CMS → Static Blocks → Add New Block.

## Setting up the Homepage

To setup your homepage, you will need to go to (CMS → Pages). Select "Home Page", with the identifier or URL Key as "home". Click on left tab “Content”, inside that you will have to input your homepage code. Please copy and paste the code below:

Last step, we have to make Magento show the custom Homepage! You must do this before you can display your homepage.

- On the left-hand side menu of "Home Page" under "Page Information" select “Design” tab.
- Under "Page Layout", on "Layout" select "**2 Columns with left bar**".
- Under "Custom Design", on Custom Theme leave as "Please Select"
