STORE PICKUP

EXTENSION FOR MAGENTO 2

USER GUIDE

## INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors, and others of **Store Pickup** Extension for Magento 2. A step by step instruction has been added to this document to help users to install the extension on Magento 2.

This extension will only work on Magento 2. As a safe practice always backup your files and database before installing any extension on Magento. If you are looking for someone to install the extension we can do it for you as well. Just go to the following link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand how to use the extension to its full capacity. If you still have questions feel free to contact us on our website.

## USER GUIDE

After installation of the extension, make sure the setup is upgraded and static-contents are deployed. Login to the admin panel and flush your Magento cache storage.

## HOW TO CONFIGURE THE EXTENSION

At the back end, go to **FME EXTENSIONS > Configurations**. Here you will find the following.

### GENERAL SETTINGS

- **Module Enable:** Select 'Yes' or 'No' to enable or disable extension respectively. If the extension is disabled, one cannot view or change either mode from the back end and will be redirected to the store's main page.
- **Page Title:** Add your title that you want to show on the front end
- **Meta Keywords:** Add your Meta Keywords
- **Meta Description:** Add your Meta Description
- **Page Heading:** Add your page heading that you want to show on the front end  
(**Note:** It will be the main heading of the Google Map store locator page)
- **Page Sub Heading:** Add your page subheading that you want to show on the front end
- **Standard latitude:** Default store listing page will be the focus on this latitude on Google map
- **Standard Longitude:** Default store listing page will be the focus on this longitude on Google map
- **API Key:** Google map API will be used everywhere in the extension where you need to get data from Google map API
- **Map Zoom:** Default store listing page will be using this zoom level on Google map
- **Store Image:** This image will be shown with store listing data

- **Marker Image:** This image will be shown on Google Maps as a marker on the store listing page and store detail page
