Getting Started!

Overview

Ajax Add to Cart Magento extension enables your customers to add or remove products from the cart ,wishlist without any page reloads and while staying on the very same page whether it is home page, category listing page, product detail page, cross sells, upsells or related products. It works for each and every kind of product such as simple, virtual, configurable or any other type. Choose custom Ajax dialog boxes, popups, images and text to display on frontend in a fabulous manner.....

Features

Product types: Extension works for all product types (simple, virtual, downloadable, configurable)

Cart options in Header: A quick view of the cart and checkout links have been placed in the header aligned with menus and can be disabled from the backend if required. Hovering over top links shows up a drop down with faded effects giving cart information dynamically. Total count of cart products is also displayed with this link.

Add/Remove Products by Ajax:When customers click on add to cart button , products are automatically added to the cart in header links and right bar. Same happens when they remove any product from cart.

Animated Product Fly Images:You can have this feature turned on which adds to the pleasant browsing experience for customers by animation while products are added to cart.

Continue Shopping Dialog box:This confirmation box pops up when any product is added to the cart. It has following options , "Continue shopping or View cart and checkout". Furthermore this dialog will remain active for the time specified at the backend such as 9 seconds etc.

My Cart and My Wishlist side bar:Quick view of the cart and Wishlist are provided in the right column of your site pages with faded or sliding effects and total number of cart or wishlist products. Recently added products are

also displayed. You can disable cart information in the header to use this right bar only.

Custom Ajax Images and Text: You can have custom images and text for Ajax loading

Configuration Features: Completely configurable from admin panel such as

- Quick cart view in header
- Activate Product Image fly feature
- Continue shopping dialog boxes
- Time for dialog boxes
- Faded or sliding effects for Cart and Wishlist side boxes

Other Features

- Highly optimized coding
- Based on Prototype
- Supports all major browsers (IE7+, FireFox, Opera, Chrome, Safari)
- Supports HTTP
- Easy to install, use and manage
- 100% Open Source
