

General Installation instructions

- First, open up your ZIP-file and copy the whole "app, skin and js"- folders on the main root of your local magento server (you will need to merge these files).
- A message may popup and warn you that there are similar files already on your server. You will need to select overwrite to overwrite the same files. If not, don't worry, it will still work.
- This may take up to 5-10 minutes depending on your connection.
- Log in to backend of your Magento Administration and go to "System" → "Configuration". At left side click on "Design" tab.
- At right side under "Theme" tab give "**pharmacy_online**" against "Default" text field.
- Give "**pharmacy_online**" against "**Skin (images/ CSS)**" text field. This is for skins and click "Save".
- Under "Header" tab give "**images/logo.jpg**" against "Logo Image Src" text field.
- Under "Footer" tab give "**Copyright ©2010 Designers Collection. All Rights Reserved**" against "Copyright" text field. You can change this text according to your company name to display in copyrights.
- Now click Save Config.
- Disable the Cache in System → Cache Management).
- Select all options. Then either refresh or disable your cache. Refresh means it will refresh your cache, Disable will disable your cache. We recommend disabling your cache when installing your theme and re-enabling it after you are done installing.
- Ok, the template is active but your template includes more functionality which needs to be configured to make it work 100%.

Static Blocks

Static Blocks are extra HTML or Plain Text that can be integrated to your store. We set these up so you can customize links, images or text included in our themes.

We are now going to install our static blocks for this theme, go to CMS → Static Blocks → Add New Block.

Home Header Links

Block Title: Home Header Links (this can be titled anything you like)
Identifier: home_header_links (must be exactly like this, with no uppercase or spaces)

Block Title:	Banner Adds(this can be titled anything you like)
Identifier:	banner_adds(must be exactly like this, with no uppercase or spaces)
Satus:	Enabled
Content:	<pre><p></p></pre>

CMS Pages

CMS Pages are extra HTML or Plain Text that can be integrated to your store. Here only About Us page is being created so you can create easily other pages by following this.

We are now going to create our cms page for this theme, go to CMS → Pages → Add New Page.

- On the left-hand side menu of "Home Page" under "Page Information" select "Design" tab.
- Under "Page Layout", on "Layout" select **"2 Columns with left bar"**
- Under "Custom Design", on Custom Theme leave as "Please Select"

About Us

Page Title: About Us(this can be titled anything you like)
Identifier: about-us(must be exactly like this, with no uppercase or spaces)
Status: Enabled
Page Layout: **2 Column**
Content:
<div class="page-head">
<h3>About Magento Demo Store</h3>
</div>
<div class="col-1">
<p>Lorem ipsum dolor sit amet, consectetur adipiscing elit. Morbi luctus. Duis lobortis. Nulla nec velit. Mauris pulvinar erat non massa. Suspendisse tortor turpis, porta nec, tempus vitae, iaculis semper, pede.</p>
<p>Lorem ipsum dolor sit amet, consectetur adipiscing elit. Morbi luctus. Duis lobortis. Nulla nec velit. Mauris pulvinar erat non massa. Suspendisse tortor turpis, porta nec, tempus vitae, iaculis semper, pede. Cras vel libero id lectus rhoncus porta.</p>
</div>

Home Page

Page Title: Home Page (this can be titled anything you like)
Identifier: home(must be exactly like this, with no uppercase or spaces)
Status: Enabled
Page Layout: **3 Columns**
Content:
<p>{{block type="catalog/product_list" name="homefeatured" template="catalog/product/featured.phtml"}}</p>
<p>{{block type="catalog/product_new" name="homeslider" template="catalog/product/new.phtml"}}</p>

Top

Page Title: top (this can be titled anything you like)
Identifier: top (must be exactly like this, with no uppercase or spaces)
Status: Enabled
Page Layout: **1 Column**

Content:

```
<p><a class="ALinks" href="{ {store url="about-us"} }">About Us</a><span
class="top_links_dvd"> | </span><a class="ALinks" href="{ {store
url="customer/account"} }">Sign In</a><a class="ALinks" href="{ {store
url="customer/account/logout"} }">Sign Out</a><span class="top_links_dvd"> |
</span><a class="ALinks" href="{ {store url="help"} }">Help</a><span
class="top_links_dvd"> | </span><a class="ALinks" href="{ {store url="delivery-
information"} }">Delivery</a></p>
<p><br /> { {type="core/template" name="sign"
template="cms/signin.phtml"} }</p>
```

Setting up the Homepage

To setup your homepage, you will need to go to (CMS → Pages). Select "Home Page", with the identifier or URL Key as "home". Click on left tab “Content”, inside that you will have to input your homepage code. Please copy and paste the code below:

Last step, we have to make Magento show the custom Homepage! You must do this before you can display your homepage.

- On the left-hand side menu of "Home Page" under "Page Information" select “Design” tab.
- Under "Page Layout", on "Layout" select "1 **Column**".
- Under "Custom Design", on Custom Theme leave as "Please Select"

Home Page

Block Title:	Home page
Identifier:	home (must be exactly like this, with no uppercase or spaces)
Status:	Enabled
Page Layout:	1 Column
Content:	<pre><p>{{block type="catalog/product_list" name="homefeatured" template="catalog/product/featured.phtml"}}</p> <p>{{block type="catalog/product_new" name="homeslider" template="catalog/product/new.phtml"}}</p></pre>

NOTE: Please create a category “Featured Product” with url key “featured-product” to display Featured Products. At home page only a link is placed to redirect towards featured products. Set “Set Product as New from Date” to some previous date to display products in slider. Only those products will be shown in slider for which ““Set Product as New from Date”” will be set.
