1. About the Extension

Sometimes store owners need to sell all or specific products in a limited quantity to last their stock for longer and serve maximum customers. **Magento 2 Limit Product Quantity Per Customer Extension** allows store owners to limit the order quantity of any product for any customer or customer group.

Store owners can set a maximum product quantity limit per customer or customer group and draft an error message if a customer violates the restriction. Customers can't place orders above the quantity limit or else they won't be able to checkout. Also, store owners can associate relevant products with a product that a customer has to purchase. For example, if a customer is buying a laptop, store owners can force him/her to purchase a laptop bag.

2. Feature List

- Limit order quantity for all or selected products
- Limit product quantity per customer or customer group
- Force customers to buy complementary products
- Define a maximum quantity limit
- Create error messages for maximum quantity & conditional products
- Specify the restriction date range

2.1 Limit the Order Quantity of Any Product

Limit Product Quantity Per Customer extension is a useful extension that helps store owners prevent their best selling items from going out of stock. They can set a maximum order quantity for any product allowed to successfully place the order.

2.2 Limit All or Specific Customer Groups

With this extension, store owners can apply quantity restrictions to any customer group. Customers from the selected group can only purchase a product according to the specified max quantity range.

2.3 Limit Specific Customers

Apply the restriction to any specific customer(s). You can go to your list of customers and select the ones that you want to abide by the restriction.

2.4 Select Conditional Products

There are products that work in conjunction and provide no or little value if bought separately. For example, laptop and bag, shoes and laces, notebook and pencil etc. If you want customers to buy complementary products, you can do so by associating them with the actual product. Customers won't be able to purchase the actual product unless they buy the conditional product(s).

2.5 Create Error Messages

You can create separate error messages for maximum quantity and complementary products. These messages will appear when a customer tries to buy a product above the max limit or does not buy the relevant products you have selected. You can use system variables such as {qty} or {product} to automatically fetch the values. The messages popup when a customer clicks the "Proceed to Checkout" button.

2.6 Set a Date Range

The extension allows you to specify a date range for the restriction. This comes in handy when you want to enforce the order quantity limitation for a specific duration, for example during sale offers or peak days.

3. Setup the Extension

3.1 Configuration

On the admin panel sidebar, go to **FME EXTENSIONS** and under *Limit Order Quantity Per Customer*, click **Configurations**. Here you will find the following settings:

- **Enable Module:** Select 'Yes' or 'No' to Enable/Disable the module
- **Error Message for Quantity:** Customize the error message that will be displayed when a customer tries to buy a product above the defined quantity limit.
- **Error Message for Products:** Customize the error message that will be displayed when a customer tries to proceed to checkout without buying the selected complementary product(s).

General Settings

Enable Module
[store view]

Yes

Error Message for Quantity
[store view]

You can only buy a maximum of {{qty}} of the {{product}}

Error Message for Products
[store view]

You have to buy {{products}} before you can proceed.

3.2 Set Quantity Limit for a Product for Customer Groups

To set a quantity limit for a product, go to **Catalog > Products** from the admin panel sidebar and click on the product to be directed to its edit page. Scroll down and you will see a new section **FME Limit Order Quantity per Customer**. Expand this section to see the following options.

- **Quantity Limit per Customer:** Set a limit for the product that you want customers not to go beyond.
- **Limit From:** Select a starting date for the restriction.
- **Limit Until:** Select an ending date for the restriction.
- **Limit Groups or Customers:** Select **Customer Groups** in the dropdown menu.
- **Customer Group:** Select the customer groups you want the restriction to apply on.

FME Limit Order Quantity per Customer

Quantity Limit Per Customer

Limit From

Limit Until

You need to insert both Start and End date to apply limit.

Limit Groups or Customers

Customer Groups

You need to select atleast one of Customer Groups or Specific Customers from below to apply limit.

Customer Group

NOT LOGGED IN

General

Wholesale

Retailer

3.3 Limit Specific Customers

To prevent individual customers from buying the controlled products above the max quantity, expand the **Limit Specific Customers** section and select the customer(s) you want to apply the restriction on.

<input checked="" type="checkbox"/>	2	Veronica	Costello	roni_cost@example.com	1

3.4 Select Conditional Products

Now, if you want to associate relevant products with the product and force customers to buy those products in addition to the one they are interested in, you can expand the **Limit Products Purchable along** section and choose the products. Note that this section is not mandatory and if you don't feel the need for complementary products, you can leave it blank. But once you have selected a product, customers can't proceed to checkout without buying it.
