1. About Extension

Magento 2 Recent Sales Notification extension enables to display a small popup on your visitor's screen. Store owners can feed recent orders to the visitors according to the predefined configurations. With recent sale notifications, you can influence your customers to buy from you.

2. Feature List

- Display recent sales feed to customers
- Two types of popup view layouts - Default & Image Centric
- Set the position of recent sale notification popup
- Display recent orders based on order status
- Set number of orders to be displayed in popup
- Display recent orders in sequence or in random order
- Customize recent sales popup
- Attractive & responsive design

2.1 Display Recent Sales

Recent sale notification extension enables to display most recent orders in an attractive popup to store visitors. Store owners can display a customized message featuring product name, price, buying time, customer location & product image.

2.2 Two Types of Popup Layouts - Default & Image Centric

This extension is equipped with two types of beautiful Popup layouts. You can choose any of the popup layouts according to your store theme & requirements. Two types of popup layouts are:

- Default Layout
- Image Centric Layout

2.3 Position Recent Sale Notification Popup

Store owners can display the recent sale notification popup in four different positions:

- Top Right
- Top Left
- Bottom Right
- Bottom Left

2.4 Display Recent Orders Based on Order Status

You can display orders in notification popup based on the order status. You can choose one or multiple order statuses to display them in a recent sale notification popup. You can multi-select:

- Pending
- Processing
- Suspected Fraud
- Complete
- Closed
- Cancelled
- On Hold

2.5 Set Number of Orders To Be Displayed in Popup

With this extension, store owners can limit the number of most recent orders to be displayed in a recent sale notification popup. E.g. Display 10 recent orders in notification popup.

2.6 Display Recent Orders in Sequence or Randomly

With this option you can display the recent orders in ascending order or display them randomly.

- **In Sequence:** The most recent order will be displayed first as the visitor lands on the web page.
- **Randomly:** With this option, the extension randomly displays the recent orders

2.7 Set Popup Display & Delay Time

Store owners can also set the recent sale notification display time and also set the delay time between popup notifications.

2.8 Customize Popup Message

This extension enables to add a custom notification message. You can use different attributes to personalize the message. Some of the supported variables are {address},{product_name},{product_price}, {customer_name} and {time}

2.9 Customize Recent Sales Popup

This extension offers lots of customization options to design the recent sale notification popup according to your store design. You can set:

- Background color
- Border color
- Text color
- Link color
- Link hover color

3. Setup the Extension

3.1 Configurations

At the backend, go to **FME EXTENSIONS > Configurations**. Here you can find the General & Popup configurations.

3.1.1 General Configurations

Now, expand the **General** Configurations **tab** and set the following configurations:
