

# FME EXTENSIONS

EXTENSION FOR MAGENTO 2

USER GUIDE

## INTENDED AUDIENCE

The content of this document is designed to facilitate the users - managers, supervisors, and others of **Form Builder** Extension for Magento 2. A step by step instruction has been added to this document to help users to install the extension on Magento 2.

This extension will only work on Magento 2. As a safe practice always backup your files and database before installing any extension on Magento. If you are looking for someone to install the extension, we can do it for you as well. Just go to the following link and let support know the order id to expedite the installation process.

Once you have installed please see the User Guide to help you understand how to use the extension to its full capacity. If you still have questions feel free to contact us on our website.

## USER GUIDE

After installation of the extension, make sure the setup is upgraded and static-contents are deployed. Login to the admin panel and flush your Magento cache storage.

## HOW TO CONFIGURE THE EXTENSION

At the back end, go to **FME EXTENSIONS > Custom Forms (Step 1)**. Here you can find all the submitted forms and the option to add new form.

Form [Add New CustomForm](#)

Filters | Default View | Columns

Actions | 1 records found | 20 per page | 1 of 1

|                          | ID | Title             | Success Url | Enable | Action | Action |
|--------------------------|----|-------------------|-------------|--------|--------|--------|
| <input type="checkbox"/> | 2  | Registration Form |             | Yes    | Select | View   |

## HOW TO ADD CUSTOM FORMS

Click on the **Add New CustomForm** button as shown in the above image, a form will appear on your screen, on which you will have to provide all the data related to the form-fields.

## FORM INFORMATION

- **Title:** Write the title of the form in the input field
- **Success URL:** Provide URL to which user will be redirected after submission of the form. If you leave this field empty, the user will stay on the same page
- **Enable Footer Link:** Option to enable footer link
- **Enable Header Link:** Option to enable header link
- **Store View:** Configure store view option by choosing the required store view
- **Customer Group:** Configure user access restrictions for different customer groups

- **Form Display Type:** Option to choose form display:
  - **Default:** This option will show the form in default view which is a new tab
  - **Pop up:** By choosing this option form will appear in a pop-up
  - **Custom Position:** If you choose this option, another field will appear on the form named "**Link Position**"

A screenshot of a web form titled 'Form Display Type'. It features a dropdown menu with three options: 'Custom Position' (selected and highlighted in blue), 'Default', and 'PopUp'. The entire form is enclosed in an orange rectangular border.

|                   |                   |
|-------------------|-------------------|
| Form Display Type | Custom Position ▼ |
|                   | Default           |
|                   | PopUp             |
|                   | Custom Position   |

- **Link Position:** Now here you have to choose an option where you want to display this form on the screen, options are available in a drop-down list

A screenshot of a web form titled 'Link Position'. It features a dropdown menu with ten options: 'Top Center' (selected and highlighted in blue), 'Top Left', 'Top Right', 'Middle Center', 'Middle Left', 'Middle Right', 'Bottom Left', 'Bottom Right', and 'Bottom Center'. The entire form is enclosed in an orange rectangular border.

|               |               |
|---------------|---------------|
| Link Position | Top Center ▼  |
|               | Top Center    |
|               | Top Left      |
|               | Top Right     |
|               | Middle Center |
|               | Middle Left   |
|               | Middle Right  |
|               | Bottom Left   |
|               | Bottom Right  |
|               | Bottom Center |

- **Enable:** Option to enable/disable the view of the form
- **Start Date:** Put a start date of the form, from which form will start appearing on the front-end
- **End Date:** Put an end date of the form, from which form will stop appearing on the front-end

- **Send Admin Notification:** Select Yes/No to send a notification to the administrator and then fill out following two fields:
  - **Send Admin Email:** Enter email of the admin to which form will be sent after submission
  - **Email Template:** Option to choose the template of the email, through which form will be sent
- **Enable Captcha:** Select Yes/No to enable/disable Captcha

## MAKE CUSTOM PAGE

At the top, it's a tab showing the page number. Here you will see Add Page Button.

**Add Page:** Option to add a new page

Here you can add multiple fields classified into 4 different types:

- **Input**
- **Select**
- **Options**
- **Advanced**

You can add fields on the page by **drag and drop** method. You have to drag the field (which you want to add on the page) from the **left-sided box** and drop it in the **right-sided box** (page).

**Input:** In the input category, you can add various types of fields,

- **Text Input**
- **Text Area**
- **Number Input**
- **Google Maps**

Option 2

**Advance:** In the Advance category you can add several types of fields

- Rating
- Country
- Country (address, city, state, province, region, zip code)
- Text
- H1 (Heading 1)
- H2 (Heading 2)
- H3 (Heading 3)

The screenshot displays the FME Extensions Form Builder interface. On the left, a sidebar lists categories: Input, Select, Options, and Advanced (highlighted). The main area shows a preview of the form with the following fields:

- Rating:** A field with five yellow stars.
- Country:** A dropdown menu with the text "Please Select".
- Country (address, city, state, province, region, zip code):** A field with the text "Address, City, State, Province, Region, Zipcode, Country".
- Text:** A field with the text "Sphinx of black quartz, judge my vow".
- H1 (Heading 1):** A field with the text "Sphinx of black quartz, judge my vow".
- H2 (Heading 2):** A field with the text "Sphinx of black quartz, judge my vow".
- H3 (Heading 3):** A field with the text "Sphinx of black quartz, judge my vow".

On the right, a "Page Content" section shows a rich text editor with a toolbar (Paragraph, Bold, Italic, Underline, Bulleted List, Numbered List, Indent, Outdent, Link, Unlink, Image, Table) and a "POWERED BY TINY" watermark. Below this, a dashed box indicates a drag-and-drop area for adding fields from the right. The fields being dragged are:

- Rating:** A field with five yellow stars.
- Address:** A text input field.
- Country:** A dropdown menu with the text "Andorra".
- Address:** A text input field.

You can also edit the fields to set up the properties of each field. For that click on the **pencil-like** button placed at the right-top of every field.

Top Bar shows the type of field, either it's a text input field, drop-down field, radio button, etc.

**Code:** Option to assign a unique code to the field

**Field Title:** Option to write the title of the field

**Class:** Assign a class to the field

**Custom Style:** Option to add custom style of the field

**Place Holder:** Option to display a default text in the field

**Required:** Option to mark field as required / not required

**Tooltip:** Option to write tooltip

**Dependency:** Make any field dependable to any other field from this option

**Layout:** Option to choose the layout of the field

- **One Column**
- **Two Column**
- **Three Column**

Click on **OK button** to save the properties of the field.

A screenshot of a configuration dialog box with an orange border. The 'Dependency' section at the top has a dropdown menu showing 'Choose an option' with a small 'x' button to its right. Below this is a button labeled 'Add Option +'. The 'Layout' section below it features a dropdown menu with 'one column' selected and highlighted in blue. Other visible options in the layout dropdown are 'Two column' and 'Three column'.
