FME Extensions

USER GUIDE

Version 1.0.0

1. About Extension

Magento 2 PreSelect Configurable Product Extension enables the store admin to preselect any combination which you would like to show by default. Admin can attract customers and simplify their shopping by showing appropriate combinations on product, category and homepage. The PreSelected combination will be highlighted in red borders to get buyers attention.

2. Feature List

- Promote popular combinations of configurable products
- PreSelect First Option(s)
- PreSelect Default Option
- PreSelect Cheapest Option
- PreSelect Most Expensive Option
- Add combination to cart with one click
- Enable PreSelect Option for Category Page
- Supports Multiple Store Views

2.1 Promote Popular Combinations of Configurable Products

PreSelect Configurable Product extension is one the best extensions to promote the popular combinations of a configurable product. This extension is equipped with multiple options to automatically PreSelect any of the combinations of the configurable product.

2.2 PreSelect First Option

With this extension, admin can promote the first option of the configurable product by configuring the PreSelect First Option at the backend.

2.3 PreSelect Default Option

PreSelect Configurable Product extension by FME enables the Admin to PreSelect the Default option of the configurable product.

2.4 PreSelect Cheapest Option

With this extension, you can also PreSelect the cheapest combination. This is one of the proven tactics to display the lowest product on the front to attract & motivate the customers.

2.5 PreSelect Most Expensive Option

With this feature, merchants can pre-select higher price combination to attract quality conscious customers.

2.6 Enable PreSelect Option for Category Page

PreSelect Configurable Product extension also gives you the option to configure the PreSelection option for category pages. You can easily enable/disable the PreSelect option for the category page.

2.7 Supports Multiple Store Views

PreSelect Configurable Product extension also supports multiple store views. Admin can easily configure this extension for multiple store views.
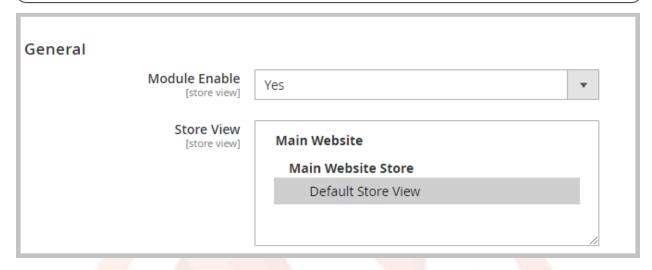

3. Setup the Extension

Configuration:

At the back end, go to **FME EXTENSIONS > Configurations**. Here you can find the following settings:
Configurable Product PreSelect -> General
- **Module Enable:** Select **'Yes'** or **'No'** to Enable/Disable the module
- **Store View >** Select any of the **Store Views**

Choose Option of Your Choice:

Choose any of the PreSelection options according to your requirements.

- **First Option PreSelect** - PreSelect the 1st option or 1st combination
- **Default Option PreSelect** - Preselect the default combination
- **Cheapest Option PreSelect** - Preselect the cheapest combination
- **Most Expensive Option PreSelect** - Preselect the most expensive combination

Note: *If the **PreSelected option does not exist,** like If "**Most Expensive Option**" is **configured for preselection** and all **combinations have the same price,** then in this scenario, **the last combination** will be Preselected. This same scenario also applies to the **Cheapest option***.

PreSelect on Category Page:

PreSelect Configurable Product extension gives you the option to enable/disable the PreSelection on category page.
